PROFESSIONAL SUMMARY

Motivated Junior Web Developer with hands-on experience in WordPress website management, frontend development, content updates, responsive design, Git workflows, and basic SEO support. Worked on client websites and web applications using **WordPress, HTML, CSS, JavaScript, React, Next.js**, and backend tools. Comfortable with website updates, plugin handling, styling changes, debugging, and documentation. Basic knowledge of PHP and database concepts, with a strong willingness to learn Umbraco and .NET-based CMS environments.

EXPERIENCE

Backend Developer

NEO DIGITAL HUB, Dubai (Remote) | Feb 2025 – Present

- Built and maintained WordPress websites and backend-based web projects.
- Developed authentication, database structure, and backend features.
- Handled updates, debugging, and ongoing improvements.
- Collaborated on workflows, deployment, and documentation.

Web Developer

AdsPro Web Services (Remote) | Jul 2025 – Dec 2025

- Built and maintained WordPress websites for clients.
- Updated pages, media, and content through CMS.
- Customized themes, plugins, and styling.
- Improved responsiveness, performance, and SEO basics.
- Supported deployment and Git-based updates.

PROJECTS

- **BabyMom E-Commerce Website** – WordPress e-commerce website with editable content and responsive layout.
- **NexTrip Global (WordPress)** – Business website with CMS content management and structured service pages.
- **MOC-PTW Safety Management System (Next, Supabase)** – Workflow-based web app with dashboards, role-based access, and request tracking.
- **Real Estate Listing Platform (MERN Stack)** – Platform for listing, browsing, and buying real estate.
